

Freedom of Movement for Clinicians

Rise above complacency and gain an entirely new perspective on lingualized occlusion that will help cut denture adjustments in half while increasing profitability and patient satisfaction. This 3 hour lecture will openly challenge current denture fabrication standards while keeping focus on the denture patient. With a greater understanding of biomechanics, minimize deflective contacts and deliver more flexibility and greater freedom of movement for patients.

Course Objectives

- Learn the concept and impact of Freedom in Centric and Freedom in Movement
- Understand how denture integration into the body and the central nervous system functions with a denture
- Utilize techniques to adjust a denture without impacting future fit, improving efficiencies and reducing errors
- Master the mechanics of the mouth and how it relates to denture function to cut adjustments in half more consistently – ultimately increasing profitability
- Determine denture patients chewing cycle and how new dentures can change and influence those patterns

LOCATION

Pickle Prosthodontics
9480 Briar Village Pt. #300
Colorado Springs, CO 80920

"Marc's knowledge and explanation on dentures and function is exceptional. His course content is superior compared to any other denture course I have taken."

Marc Wagenseil, CDT, DD

A VITA Global Certified Trainer, Marc is a licensed denturist and dental technician with 30 years of experience. As the owner of Heritage Denture Centre and Heritage Dental Lab in Edmonton, Alberta, Canada, he has spent his career focusing on how dentures integrate in the mouth and body and inspires a unique awareness of occlusion and professional growth.
